Summary

Results-driven Software Engineer with certification in Frontend Engineering and professional full-stack experience at Clover. Experienced in owning feature development and making data-driven technical decisions while building responsive web applications using React and TypeScript on the frontend, and leveraging Spring Boot for robust backend services. Proven ability to collaborate with cross-functional teams, communicate technical concepts clearly to non-technical stakeholders, and translate product requirements into scalable solutions that bridge user experience with system architecture. Committed to writing clean, maintainable code and proactively identifying technical challenges across the development stack.

Work Experience

Clover

Full Stack Software Engineer

Sep 2024 - Present

Colorado Springs, CO

- Partnered with Product, Design, and QA teams to engineer and deploy full-stack billing system features, translating business requirements into technical solutions using Spring Boot and React/TypeScript, resulting in streamlined payment processing workflows that improved user experience across multiple stakeholder groups.
- Documented complex billing system integrations and created technical guides for team onboarding, enabling faster knowledge transfer and reducing new developer ramp-up time by clearly explaining system architecture and integration patterns to both technical and non-technical team members.
- Managed microservice deployments through Jenkins CI/CD pipelines, implementing containerization strategies with Docker and orchestrating production releases using Kubernetes cluster management on Google Cloud Platform

Projects

StackPedia | <https://www.stackpedia.dev/>

- Created a full-stack web application empowering users to explore and learn about new technologies and software stacks, fostering knowledge sharing and community engagement.
- Crafted a responsive UI using TailwindCSS, ensuring a seamless experience across devices.
- Designed and deployed a scalable REST API using Spring Boot and PostgreSQL, incorporating JWT-based user authentication with role based authorities and protections while enabling efficient data management and seamless integration with front-end services.

Clover Apprenticeship Showcase | <https://mv-portfolio-livid.vercel.app/>

- Developed a responsive React portfolio application with TypeScript and Mantine UI, featuring an interactive timeline showcasing professional growth and a dynamic project gallery with video demonstrations

BiteSync | <https://bitesync-client.vercel.app/>

- Developed a comprehensive Spring Boot REST API for restaurant inventory management, implementing complex business logic including automatic menu item cost calculation based on ingredient requirements, real-time inventory tracking, and transactional order processing with atomic stock deduction
- Designed and implemented sophisticated JPA entity relationships with advanced business rules, including dynamic menu availability calculations, inventory validation logic, and cross-entity data integrity using Spring Data repositories and transactional management
- Developed a comprehensive React-based restaurant management dashboard with JWT authentication, featuring dynamic inventory tracking, menu management with ingredient relationships, and order processing capabilities serving 15+ restaurant operations workflows

Mizu Izakaya | <https://mizu-izakaya.vercel.app/>

- Developed a dynamic restaurant website using Next.js 14 and TypeScript, featuring an interactive file system-based image gallery with modal overlays, keyboard navigation, and responsive CSS Grid layout accommodating 20+ restaurant images
- Integrated third-party services including OpenTable reservation system with dynamic script loading, social media connectivity, and optimized image processing resulting in improved user engagement and streamlined booking flow

Education

Turing School of Software & Design

Accredited Frontend Software Engineering Certificate

Nov 2023 - Jun 2024

Denver, CO

Skills

- HTML, CSS, JavaScript, React, Next.js, Java, Spring Boot, TailwindCSS, Jest, Mocha, Chai, Cypress, JUnit, Mockito, AssertJ, Node.js, Express.js, MongoDB, TypeScript, PostgreSQL, MySQL, Docker, Kubernetes, Jenkins, Content Management Systems, Google Cloud Platform(GCP)
